

NARDI **COMPRESSORI** **LOW PRESSURE**

Quality system certified
to ISO 9001:2015

COMPRESSORS 8 – 30 BAR

Catalogue

(ENG) NARDI COMPRESSORI was founded in 1965 by the Ghiotto family in Montecchio Maggiore (Vicenza). The  indicates the union of the two names Nardi and Ghiotto owners of the company and leaders in the design and construction of high-tech compressors. In 2008 ongoing investments to improve production processes led to the purchase of a facility of 7000 m² with modern and efficient departments. In 2010, the company was certified UNI EN ISO 9001:2015 with the certifying body TÜV which is among the most qualified in the world. Always careful about production and technology, NARDI COMPRESSORI is proud of having a fully ITALIAN production with testing of each product

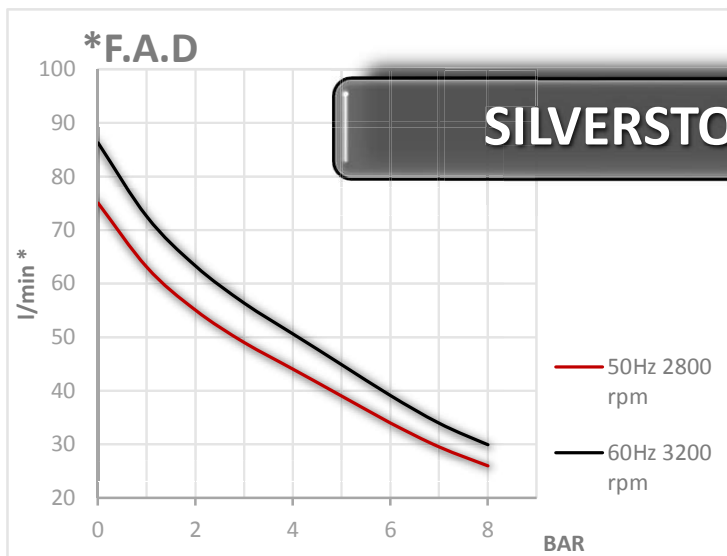

individually. Today NARDI COMPRESSORI distributes in over 100 countries around the world it a range of compressors from 8 bar up to over 500 bar whit a production of over 30,000 units individual anality control of each year.

(ITA) NARDI COMPRESSORI è stata fondata nel 1965 dalla famiglia Ghiotto a Montecchio Maggiore (VI). Il simbolo  indica l'unione dei due nomi NARDI e GHIOTTO titolari della azienda, leader nella progettazione e costruzione di compressori ad alto contenuto tecnologico. I continui investimenti atti a migliorare i processi produttivi hanno portato nel 2008 all'acquisto dello stabilimento di 7000 m³ con reparti efficienti e moderni. Nel 2010 l'azienda si è certificata UNI EN ISO 9001:2015 con l'ente certificante TÜV fra i più qualificati al mondo. Sempre attenta alla produzione e alla tecnologia, la NARDI COMPRESSORI vanta di una produzione completamente ITALIANA con collaudi di ogni singolo articolo. Oggi è apprezzata in più di 100 paesi in tutto il mondo con una gamma di compressori che va dai 8 bar fino a oltre i 500 bar e una produzione che supera i 30.000 pezzi prodotti ogni anno.

SPONSOR GP2 2015 - 2017

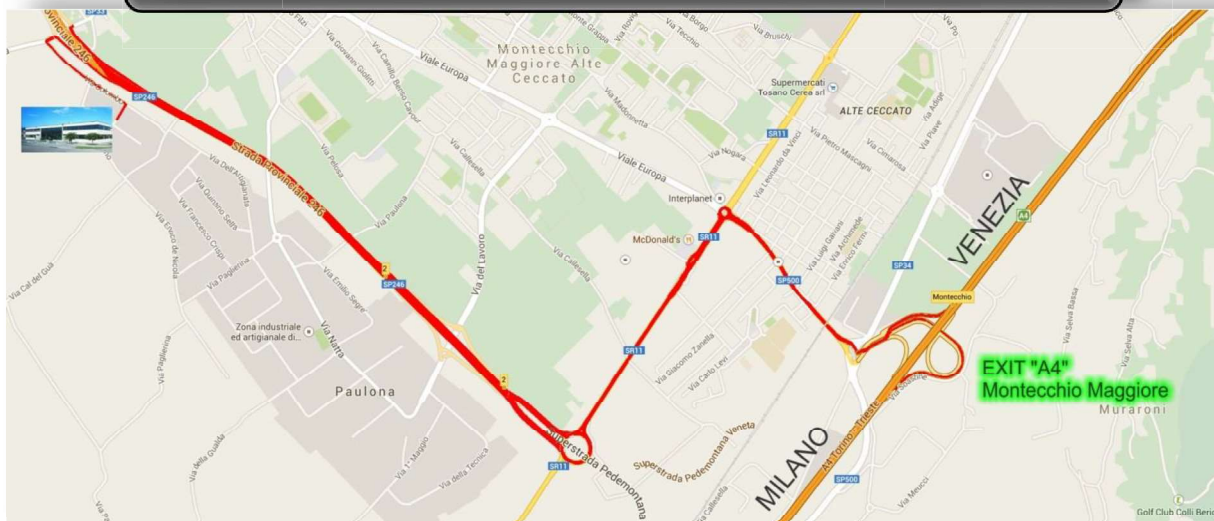

Compressor Model	Cylinders	Air Intake	Pressure	Power	Phase	Revolution	Noise	Weight	Dimensions

A complete line of oil free Low Pressure compressors with maximum working pressure of 10 Bar plus a new line of 30 Bar compressors. These compressors have different tanks capacity up to a maximum of 90 liters. Power includes single phase and 3-phase AC electric motors, DC electric motors (battery) as well as internal combustion engines.

High Pressure compressors up to 450 Bar for the filling of cylinders for breathing air, used often for scuba diving and by fire stations for fire and rescue operations as well as for military applications.

High Pressure compressors and Boosters up to 450 Bar. Technical gas compressors with high degree of purity for industrial use, the range is completed by the supply of High Pressure cylinders for storage in different capacity and configuration.

High Pressure compressors for refueling of vehicles that run on natural gas. Compressors in this line have been designed for Industrial and domestic use, creating simple and economic small refueling stations for private utility using gas supplied through the network lines.
